DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1, 4-12, and 14-21 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims are rejected for the following reasons:

Claim 1 recites the limitation "the length of the perimeter" in line 9. There is insufficient antecedent basis for this limitation in the claim.

In claim 6, if the locking member in the locked position extends across the deformable portion, then how is the locking member "arranged selectively to prevent disengaging of the lid"?

To what structure is the catch of claim 7 engaged to prevent deforming of the deformable portion?

In claim 16, is there structure to allow the catch to lie "substantially flush" to the lid when engaged? If there is no structure to allow the engaged catch to lay substantially flush to the lid, to which portion of the lid is it "substantially flush"?

Dependent claims not specifically mentioned are rejected as depending from rejected base claims since they inherently contain the same deficiencies therein.

Allowable Subject Matter

2. Claims 1, 4-12, and 14-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

3. In view of the new grounds of rejection, this Office action is made non-final.

4. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without

Art Unit: 3781

specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
